Campus Town Hall Meeting
September 19, 2019
As for the idea of propriety in communication ethics and my career, I think it boils down to what each individual sees as true. A person must have or believe in good morals and justice. I see my future as being an Event Planner, which entails catering to my clients and their activities, which means sacrificing my own likes and dislikes. I would also have to look at the ethics behind their decisions and truly see the motivations of why they chose what they chose.

Kaitlin Rosette Cabe

COM 3513 Communication Ethics
Learning about how to be a good minister is one thing, but putting it into practice is very different. I have lately felt called to work with both children, teens, and young adults in the field of psychology, either in counseling or art therapy. I learned through my work at Rosemary Village that my ministry calling strongly pushes towards service to others through building relationships. I feel specifically called to those who are weak or suffering, such as people who are physically or mentally sick, or children who need love and care.

I hope to one day work with children and adults who have various disabilities. I hope to make their lives easier and more enjoyable. After I graduate in May I plan to continue my schooling so I can become a behavioral therapist. This would allow me to meet one-on-one with many of the people we saw at this event and help them work on how they respond to different events. This event was a perfect time for me to observe and figure out exactly what I want to do with my future.
