Dear Graduate Student,

Congratulations and welcome to the Graduate Program of the Palm Beach Atlantic University (PBA) School of Nursing. We hope your studies will be personally satisfying, as well as professionally stimulating and challenging. This handbook was created to assist you with your transition to graduate studies by providing a quick source of information for frequently asked questions.

We realize that the choice to seek graduate study represents a significant commitment on your part, and we hope that the experiences here will surpass all your expectations. I encourage you to appreciate the learning potential provided by your mentors, your classmates, other disciplines, and the many other resources available to you through the University. It is our goal to provide you with a faith based approach to your graduate nursing education that will support our goals of calling to Christ and service to community.

Best wishes for a successful program of study in the Master of Science in Nursing (MSN) or Doctor of Nursing Practice (DNP) program. It is my goal to get to know each of you more personally over the next few years. Please feel free to contact me if I can be of any help to you in your PBA journey.

Blessings,

Joanne Masella Ed.D., MSN, RN
Dean, Professor
Palm Beach Atlantic University School of Nursing
Accreditation
The Master of Science in Nursing and Doctor of Nursing Practice programs at Palm Beach Atlantic University, School of Nursing are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW Suite 530, Washington, DC 20036.

School of Nursing Mission
The mission of Palm Beach Atlantic School of Nursing is to prepare graduates for a life of service in the profession of nursing within a Christ-centered environment incorporating intellectual, professional, and spiritual integrity.

MSN Program Mission, Goals, and Expected Outcomes

**MSN Program Mission**
The MSN Program Mission is to prepare graduates for advanced nursing practice with specific functional and clinical abilities with a Christ-centered focus.

**The MSN Program Goals are:**
- Provide master's degree level nursing education that builds on baccalaureate nursing foundation.
- Prepare graduates for advanced nursing practice with specific functional and clinical abilities.
- Prepare graduates for doctoral studies in nursing.

**MSN Expected Student Outcomes**
A graduate of the MSN program will be able to:
- Synthesize theoretical and empirical knowledge from the liberal arts, sciences, humanities, Christian faith to support ethical decision making for optimal health outcomes.
- Apply organizational and systems leadership principles to strengthen nursing practice and healthcare delivery.
- Analyze research and scholarly activities that support evidence based practice, nursing education, clinical practice, and healthcare organization.
- Analyze technology and information systems to improve healthcare quality and safety clinical prevention and population health.
- Analyze healthcare policy to improve patient and community health outcomes.
- Develop collaborations with leaders in nursing and other disciplines to improve the quality of professional nursing practice and health outcomes.
- Demonstrate nursing practice nursing at the master’s degree level.

**Practicum II Project**
As part of Advanced Nursing Practicum II, students will complete an evidenced-based, quality improvement plan addressing an area of concern in at their practicum site. Students must write a manuscript suitable for publication to successfully complete the course.

**MSN Program Catalog Links:**
- MSN Required Courses and Approved Electives

DNP Program Mission, Goals, and Expected Outcomes

DNP Program Mission
The mission of the Doctor of Nursing Practice program is to prepare experts in specialized advanced nursing practice with a Christ-centered focus.

The DNP Program Goals are:
- Provide doctoral nursing education that builds on prior nursing education.
- Prepare graduates for enhanced knowledge and skills in a specialized area of practice.
- Develop graduates as leaders within the healthcare community, implementing a Christian worldview.

DNP Expected Student Outcomes
A graduate of the DNP program will be able to:
- Synthesize theoretical and empirical knowledge from the liberal arts, sciences, humanities, Christian faith to support ethical decision making for optimal health outcomes.
- Advocate healthcare policy at all levels to improve patient and community health outcomes.
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional nursing practice, outcomes, and the healthcare system.
- Synthesize evidence-based practice, organizational leadership, and technology to support quality improvement in clinical prevention and population health.
- Practice advanced nursing for complex populations.

- General University Policies

Practice Course Policies
The term practicum is used within the curriculum to describe courses that focus on the integration of systems leadership, evidence based practice, healthcare technology, and quality improvement. The term clinical is used to denote courses with hands on patient care with an advanced practice focus.

Student practice sites may be at the student’s place of employment, however, the preceptor must not be the student’s supervisor, and it must be clear that the student’s role on practice days is different than during scheduled work time. Faculty evaluate student performance in collaboration with the preceptor.

Each practice course requires 50 practice hours per credit, so a 3 credit practice course requires 150 hours.
Preceptor selection

All practice courses require students to select a preceptor. The preceptor acts as a guide and mentor within the practice setting and role. The requirements of practicum and clinical preceptors are quite different and are listed below. Students are responsible for securing and scheduling their own preceptors to facilitate student schedules and develop professional communication.

Practicum Preceptors

The profession of nursing is practice based, and utilizes the preceptor approach to assist the novice nurse in developing decision-making clinical skills in the practice setting. This strategically constructed mentorship relationship is time limited in its nature, yet often is beneficial to both the preceptor and the student. The preceptor is a practicing nurse or other healthcare professional, who may benefit from the student support in their clinical role, while being a content area expert. The preceptor is able to impart knowledge from their experiences in the healthcare field to the developing professional nurse.

A preceptor has a special opportunity to share their knowledge, attitudes and skills with an advance practice nursing student, who may only have a limited amount of experience in that clinical area. The preceptor is a role model, who will allow the student to observe and experience what an expert in the field will do on a daily basis. The preceptor will challenge, guide, direct, and support the student in all areas of development. Sharing professional values, beliefs, and skills, while incorporating professional standards of practice and legal and ethical parameters is the primary focus.

The Preceptor for Advanced Nursing Clinical Practicum and DNP Practicum courses should be a nurse leader in the healthcare industry. If a preceptor is not a nurse, the student must be able to show how they are emulating a nurse leader role in the setting. The role of the student in this setting is to review strategies for improving healthcare delivery through the application of evidence based approaches to design a practice change. They will work closely with the staff in the healthcare organization to enhance nursing practices and leadership.

Clinical Preceptors (Nurse practitioner)

General criteria:
1. Nurse Practitioners are preferred.
2. You can have up to 25% (150) of your NP clinical hours with a physician.
3. Preceptors must have at least one year of experience as an ARNP or physician (you cannot use a PA)
4. You can use more than one site if one site will not give you enough hours or enough patients or the right mix of patients.

Specific Guidance for Primary Care I Clinical:
1. This first rotation is a Primary Care rotation for adult health, so you can use EITHER Family Practice OR Internal Medicine practices.
2. You can NOT use specialty practices for this first rotation, such as rheumatology or GI.
3. You can NOT use an ER for this first rotation (or second rotation).

Specific Guidance for Primary Care II Clinical:
1. Need Pediatric patients (from newborn / infants/ and adolescents)
2. Need Female/women’s health patients (including prenatal care)

Specific Guidance for Primary Care III Clinical:
1. Preferred is Family practice
2. Could potentially do ER (or urgent care) here as long as the ER NP is family practice and not emergency medicine.
Specific Guidance for 4th Clinical is APRN Clinical Immersion:
1. If you want to specialize after you graduate, here is where you can do a specialty, such as GI, but it needs to be primary care focused, not acute care.

Tips for Looking for Sites:
1. Think about NPs or physicians that you already have relationships with.
2. Think about NPs or physicians that work in clinics associated with your own health system.
3. Look in your Insurance “Find a provider” and look for the appropriate criteria.
4. Attend NP Council dinners and talk with other local NPs.
5. Look in Medatrax. The list of already approved and contracted sites is available there.

Clinical Preceptors (Executive Leadership)
General criteria:
1. Nurse executive (these include but are not limited to: Chief Nursing Officers (CNO), Program Administrators, Practice Administrators, Chief Executive Officers (CEO) and Chief Operating Officers (COO)
2. You can use more than one site if one site will not give you enough hours or enough patients or the right mix of patients.

Tips for Looking for Sites:
1. Think about nurse executives that you already have relationships with.
2. Think about nurse executives that work in clinics associated with your own health system.
3. Look in Medatrax. The list of already approved and contracted sites is available there.

MSN / DNP - I’ve found a preceptor. What do I do?
Contract the Site and Preceptor
1. If the practice site already has a contract, simply upload your completed Preceptor Agreement form and Preceptor CV to Medatrax. DNP students beginning nurse practitioner clinical hours must also complete the Graduate Preceptor Approval Form
2. If the practice site does not have a contract, then send the contact information to the Graduate Coordinator and do step 1 above.
3. If the preceptor works for a large health system that the SON already has a contract with, you shouldn’t (emphasis on should, but you never know) need a separate contract, but it doesn’t hurt to ask.
4. If we do not have a contract, then ask for the practice’s contact information and send it to the Graduate Coordinator who will send them the appropriate contract.
5. Even if the student is continuing with the same preceptor a new Preceptor Agreement form must still be filed.

Approve the Site and Preceptor
1. The practice site and preceptor must be approved by the Graduate Faculty Course Coordinator prior to beginning the clinical rotation. If you do not obtain approval or denial within one week, please contact them again.
2. You must upload the Preceptor’s CV to Medatrax prior to beginning your clinical hours. Preceptors are considered an extension of faculty, and their credentials must be reviewed prior to acceptance.
3. Upon approval by the Graduate Faculty Course Coordinator, the preceptor will be provided with general preceptor orientation materials.
4. It is the student’s responsibility to provide the Preceptor with the Course Syllabus

Required Documentation/Attestation
Students are responsible for completing all documentation required by the SON and the practice site including but not limited to:

- Background check
- Urine drug test
- Appropriate immunizations
- Tuberculosis testing
- CPR certification
- RN License
- Liability insurance policy
- Site Specific Forms

Note that Influenza is required by certain facilities and may not be waived at those facilities.

Course Semester
1. As Practicum Courses I and II are highly individualized, the Student, Course Faculty, and Preceptor will collaborate to determine appropriate outcomes. The Learning Outcomes Table will be approved at the beginning of the course by the preceptor and graduate faculty professor. The preceptor will evaluate the student mid-term. Both preceptor and faculty will evaluate the student upon course completion.
2. Student is to upload their final signed Learning Outcome Table into Medatrax.
3. The Student is responsible for setting a schedule with the Preceptor and entering the schedule into Medatrax. We highly suggest that students build in extra time in case of unforeseen circumstances.
4. At the completion of the semester, several different evaluations will be completed in Medatrax:
   a. Evaluation of the Student by the Student
   b. Evaluation of the Student by the Preceptor
   c. Evaluation of the Student by the Faculty member
   d. Evaluation of the practice site by the student.
   e. Evaluation of the Preceptor by the student.

What constitutes “Practice Hours”
Practicum Hours
Contrary to popular opinion “everything you do” toward a project does not count. The vast majority of hours should be completed on site or as directed by the preceptor (e.g., a community meeting). Travel time to and from the site are not included.

Clinical Hours
For Nurse Practitioner and Executive Leadership clinical hours must be completed on site with the preceptor. Travel time to and from the site are not included.

When do I need to get IRB approval for my Practice hours?
See IRB section below.

Scholarly Project Policies
See Scholarly Project Expectations https://my.pba.edu/ICS/Schools/Nursing/DNP.jnz for more detailed policies.

Other Considerations
Any time a student collects data in a formal manner that may be reported, the student should seek IRB approval. This includes surveys of staff members at the practice site. Note that this does not include surveys developed by the practice site that the student merely administers as part of their practice hours. However, if the student adds to
the survey or uses a subset of the data for their own project, the student should seek IRB approval. See IRB under General Policies below for additional information.

**General Policies**

**Professional Web Presence**

All Graduate students are required to develop a Professional Web Presence by the end of semester 2. Ideally the presence includes a website, e-mail list, Facebook profile, Twitter, and LinkedIn. For the purposes of the program, a website, e-mail list, and one other Social Media venue of the students choosing will suffice. The cost of the presence ranges from $30 to $80 per year depending student preference.

**Institutional Review Board (IRB)**

By supporting the scholarly activities of students, the University aids in scientific and scholastic contributions to society. Under the direction of the Office of the Provost, the Faculty Research Council coordinates University research activities and review of faculty/student research proposals. The Faculty Research Council will serve as the Institutional Review Board (IRB) and as the Institutional Animal Care and Use Committee (IACUC). Grants and sponsored research opportunities are available from a wide variety of sources. The Faculty Research Council offers assistance in many phases of proposal development such as locating funding sources, assisting with budget preparation, and guiding the proposal through the internal approval process. Initial research proposals must be approved by the Faculty Research Council (IRB or IACUC) before the research may begin. Research projects lasting more than twelve months must be reviewed annually by the Review Board by the anniversary date (i.e., month and day).

Palm Beach Atlantic University faculty, students, and researchers are required to follow all guidelines specified by the Department of Health and Human Services (DHHS) policy on Protection of Human Subjects (Title 45 CFR, Part 46, revised July 14, 2009) and the Belmont Report: Ethical Principles and Guidelines for the Protection of Human Subjects of Research (April 18, 1979) in all research activities requiring human subjects. This includes all projects regardless of whether the funding is internal or external. All research projects involving human subjects will be reviewed and monitored by the Institutional Review Board (IRB) in accordance with the above mentioned policies. Strict adherence to all regulations is required by law.

Research involving the use of humans as research participants falls under the supervision of the Palm Beach Atlantic University Institutional Review Board (IRB). Here, research is restricted to the systematic investigation of questions designed to develop or contribute to generalizable knowledge, involving the collection of data from or about living human beings. The IRB does not review research utilizing published or publicly available documents or research on elected or appointed public officials or candidates for public office. Research involving the use of animals as research participants falls under the review of the Institutional Animal Care and Use Committee (IACUC).

**Grading Scale for Graduate Nursing Courses**

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>100-93</td>
</tr>
<tr>
<td>A-</td>
<td>92-90</td>
</tr>
<tr>
<td>B+</td>
<td>89-87</td>
</tr>
<tr>
<td>B</td>
<td>86-84</td>
</tr>
<tr>
<td>B-</td>
<td>83-82</td>
</tr>
<tr>
<td>C+</td>
<td>81-79</td>
</tr>
<tr>
<td>C</td>
<td>78-75</td>
</tr>
<tr>
<td>D</td>
<td>74-65</td>
</tr>
<tr>
<td>F</td>
<td>74 and below</td>
</tr>
</tbody>
</table>
*Any grade below “B” average is not accepted for progression in the DNP graduate program. The average of all test and quiz scores for a course (Advanced Pathophysiology, Advanced Pharmacotherapy, and Primary Care I, II, & III) must be a minimum of 84% in order to successfully pass a course in addition to a minimum 84% overall in the course. The test scores are 70% of your course grade.

**Additional Policies**

- Become familiar with your student email address. We ask that you check for incoming messages daily. All contact information should be provided to the Graduate Nursing Coordinator, and updated as needed.
- Ensure your current name, mailing address, or email address and phone numbers are
  - Updated with Sailfish Services, Registrar, Financial Aid, etc.
  - Notify Graduate Nursing Coordinator of changes
- Prepare a schedule to allow yourself adequate time for reading, study, literature searches, and presentation and manuscript preparation. Utilize faculty and staff to assist with navigating resources on campus.
- Prior to or upon admission, each student will undergo a criminal background check. Student will be responsible for the cost of the criminal background check. If the student is found to have a felony or criminal history that prevents the student from gaining clinical experiences, the student will be immediately dismissed from the program. All updated information should be uploaded into the compliance and immunization management system.
- Students admitted to the program must have and maintain:
  - Current CPR certification
  - Evidence of Hepatitis B, MMR, polio, and tetanus vaccination or immunity
  - Influenza vaccine is recommended. Students may sign a waiver, but this may impact the student’s choices for clinical sites.
  - Freedom from tuberculosis as evidenced by a negative PPD or health provider
  - Examination
  - Health insurance

**Student E-Mail**

Palm Beach Atlantic University provides an email account to support students in their graduate studies. Students are required to have an email address that ends with ‘@pba.edu’. All communication to graduate nursing students will be sent to the pba.edu address. Students are expected to check their e-mail on a daily basis for updated communications.

**Dress Code**

In all settings the student is to dress business casual, and wear a nametag that identifies students of Palm Beach Atlantic University Graduate School of Nursing. In Hospital or Clinical settings, students are to wear a white fingertip lab coat with the Palm Beach Atlantic University School of Nursing emblem. It is to be embroidered on the left side of the jacket. All articles of personal attire should be clean, wrinkle-free and in good condition. Hair must be well groomed.

Male students should be clean shaven or wear neatly trimmed beards or moustaches. Fingernails should be clean, short, rounded, smooth and unpolished. All direct care providers should have short nails and clear polish (seems to have no effect on the microbial load). Professional clothing (business casual) is appropriate for most agencies. Wear solid pants or skirts NO JEANS. Skirts should cover your knees when seated. Polo type shirts or button down shirts/blouses will show no exposed skin and completely cover midriff. Proper under garments must be worn. Closed-toed shoes and hosiery/socks are required. Scrubs should only be worn in certain clinical settings. You must have approval from preceptor and clinical instructor before these can be worn. Jeans, tee shirts, tee shirts with logos and tennis shoes are not to be worn in any setting. These criteria are a minimum. Students must always follow the agency’s policies and the dictates of judgment and professionalism.
**APA**

Submit written work on appropriate paper, on-time, and typed neatly in APA style unless otherwise specified. The student must prepare the proposal manuscript consistent with the format of Publication Manual of the American Psychological Association (6th ed.), hereafter referred to as the APA manual. In general this means that the manuscript must have the components of a title page, abstract, table of contents, table of figures (if any), body with headings and subheadings, reference list, and Appendixes. “The font for the manuscript should be 12 point Times New Roman. The paper should be double spaced. Margins on all pages should be as follows: right, top and bottom 1”; left 1.5”. The extra margin on the left gives space for binding without interfering with the text's readability.” The student must adhere to standard rules of grammar and punctuation, most of which are given in the APA manual. Refer to a Standard English language text if necessary. Make full use of language tools available with most word processors (e.g., spell check, grammar check). The APA manual contains a manuscript checklist in its Appendixes, which should be very helpful in complete preparation with APA format. All references must be cited in the manuscript. All citations in the text (with the exception of personal communications) must pair with a reference in the reference list. Please remember, faculty do not award points for APA, but will deduct if not according to format.

**Plagiarism**

Plagiarism may occur in many different ways and may present itself intentionally or unintentionally. It’s the student’s responsibility to avoid plagiarism as this violation may lead to the receiving of an “F” for a course and/or being dismissed from the Graduate Program. Faculty in the graduate program may utilize Turnitin, an internet-based plagiarism service, to assist with checking unoriginality of content. To avoid plagiarism, please review the following catalog. Additional information will be made available in eCollege.

**Academic Standards, Requirements for Progression, Probation, and Dismissal**

Students must receive a grade of B in all courses to be allowed to progress in the program. Any graduate student whose cumulative GPA from courses taken at Palm Beach Atlantic University for graduate credit is below 3.0 will be placed on academic probation. If a student does not receive a grade of B in a course, the student may not progress to the next core/specialization course. If a student fails a course, the student has only one opportunity to repeat that course and successfully obtain a grade of grade B or higher. Students who fail in any subsequent course will automatically be dismissed from the graduate nursing programs. Therefore, any student failing 2 courses will be dismissed from the graduate nursing program.

Courses that are designated Theory and Clinical—e.g., NUR 7033 Primary Care I: Acute and Chronic Health Problems and NUR 7053 Primary Care I: Acute and Chronic Health Problems: Clinical—are co-requisites and must be taken together. The School of Nursing requires that theory and clinical courses must be successfully completed together.

- If a student withdraws from a Theory course, the student must also withdraw from the Clinical course.
- If a student withdraws from a Clinical course, the student must also withdraw from the Theory course.
- If a student is unsuccessful in a Theory course but is passing the Clinical course, the student will receive a W in the Clinical course.
- If a student is unsuccessful in a Clinical course but is passing the Theory course, the student will receive a W in the Theory course.

The program faculty recognizes that situations may arise which prevent students from successfully matriculating through the program. Students who are concerned about their academic standing should contact their advisor. If it
appears the student may not be able to achieve a minimum passing grade in a course they may be encouraged by a faculty member in the graduate program to withdraw from the program. All students who withdraw or who are academically dismissed from the program can reapply for admission. However, readmission is not guaranteed.

**Professional Development Guidelines**

Preparation for the professional practice of nursing requires more than the acquisition and application of knowledge. Therefore, in addition to the academic criteria listed in the progression and retention policies in the nursing student handbook and the university student handbook, the student must demonstrate:

1. Appropriate and respectful interpersonal relations and communication with clients, peers, faculty and other health care personnel.
2. Responsible fulfillment of class and practicum obligations, including timely, safe provision of nursing care in the practicum setting based on sufficient knowledge; and
3. Honesty and integrity in all academic and professional matters.

These expectations are minimally essential to professional nursing practice and should be met in both classroom and clinical settings however individual instructors may stipulate other rules for professional behavior as appropriate to the course and as outlined in the syllabus. The following are examples of behavior that may hinder maximum professional growth and competence as a professional nurse and are specifically discouraged:

**Tardiness** is defined as arriving 5 minutes after clinical or lab has been started by the instructor. Tardiness in the clinical setting can place a client or peer in an unsafe situation. You must speak in person (face to face, phone) to your clinical instructor if you are going to be tardy or absent in either lab or clinical. Calling the school or facility, leaving a message, or sending e-mail is not acceptable.

**Absences** are also very serious and difficult to make up. Clinical instructors will work with the Associate Dean to determine the method of making up missed clinical experiences. Additional absences from clinical or live class sessions may result in a Performance Improvement Plan, failure to meet clinical outcomes and a failing grade. Make-up for clinical or lab sessions must be approved by the Associate Dean or designee.

**Late work** is a reflection of poor organizational habits as well as being unprepared for classroom or clinical learning. All late work must be negotiated well in advance of the assignment due date. Simply informing the instructor that you intend to be late with an assignment is not acceptable. Any late work not negotiated in advance with the instructor, or any two instances of late work in a course, will result in a student Prescription for Success or Performance Improvement Plan, and point deduction per policy or syllabi. Students who are unable to complete the required clinical hours during the date of course schedule, may request to receive an incomplete for the course. A Prescription for Success must be initiated, with the proposed dates to complete the clinical hours before the start of the next semester, and subsequent clinical course. A student will not be permitted to progress in the program if these hours are not completed.

**Disrespectful behavior** is defined as inappropriate verbal or non-verbal behavior that is offensive, argumentative, ill-informed, or lacking in sensitivity to the dignity of any individual. Disrespectful behavior in the clinical setting creates a non-therapeutic and unsafe environment. In the academic setting, it creates a hostile environment and is a violation of academic integrity. Because of its serious consequences and potential threat to client safety, one instance of disrespectful behavior will result in a Performance Improvement Plan.

**Dishonesty** as a violation of professional ethics and standards is defined as the intentional falsification or omission of information that has the potential to mislead, harm, or take unfair advantage. Dishonesty may take many forms including plagiarism, documentation of inaccurate or unverified patient data, and failure to report unethical or unsafe professional practice. Dishonesty is most serious and can result in failure, suspension, or dismissal.
A Prescription for Success or Performance Improvement Plan specifies the exact professional behavior that is in need of development and the specific sanction that will be applied with the current or subsequent violations of professional guidelines.

**Criteria for Immediate Dismissal**

Any of the following conditions may result in immediate dismissal from the School of Nursing – Graduate Program. Behaviors identified as criteria for dismissal include but not limited to:

- Unsafe clinical practice that may impact patient safety.
- Any instance that warrants a second warning.
- Disrespect for a faculty member or clinical site representative.
- Academic dishonesty in any form (e.g., plagiarism, cheating, stealing).
- Misrepresentation or fabrication of events surrounding an incident involving professional practice.
- Misrepresentation or fabrication of data or clinical records.
- Behavior not commensurate with professional expectations.
- Positive drug test or criminal background check while enrolled in the program – A student can be asked to complete a drug test or criminal background check by the Dean of the School of Nursing at any time while enrolled in the program. Failure to abide in completing the test or obtaining adequate documents will be automatic dismissal from the program. Positive tests and backgrounds checks are the responsibility of the student.

** The student will not be eligible for readmission to the Graduate School of Nursing in any time if above instances occurs.

**Expenses**

Graduate students may incur additional fees in specialist programs that are not included in the tuition credit. Some examples are the following but not limited to:

- Textbooks
- Clinical supplies i.e. lab coat, stethoscope
- Associate memberships
- Annual national conferences requiring transportation, room, meals, registration fees
- Malpractice insurance
- Recertification courses i.e. CPR, ACLS
- Course fees i.e. Advanced Health Assessment
- Review courses for certification examination

**Computer Requirements**

The delivery of this program features online learning. Students should have their own computers with access to high-speed Internet and printer. PBA will provide students with a subscription to Office360, which includes e-mail, Word, Excel, and PowerPoint. It is the student’s responsibility in being able to send/receive emails with attachments and operate basic computer software such as Word, Excel, and PowerPoint. Classes will require students to watch videos that contain audio and video through PowerPoint, Webcam software, headsets or a DVD. The student is responsible for sending or receiving information from a computer that has an active up-to-date antivirus program.
Professional Organizations

Palm Beach Atlantic Honor Society of Nursing (HSON) was officially launched in January 2013, and worked toward the establishment of the organization as an official charter of the Sigma Theta Tau International (STTI) Honor Society of Nursing, with chartering ceremony in March 2016, as the Chi Phi – Chapter # 523. STTI purposes are to recognize superior achievement, to develop leadership qualities, to foster high professional standards, to encourage creative work, and to strengthen commitment to the ideals and purposes of the profession. Membership is by invitation to undergraduate students, graduate students and community leaders. The criteria for induction of graduate students are completion of one-fourth of the required nursing curriculum and a GPA of 3.5 or greater. After graduation, students continue their membership in the society as alumni.

Graduate students are also strongly encouraged to hold yearly membership in one or more of the following professional organizations below if residing in Florida:

- Palm Beach County Nurse Practitioner Council (PBCNPC)
- Florida Nurse Practitioner Network (FNPN)
- AACN Graduate Nursing Student Academy (GNSA)
- Florida Organization of Nurse Executives (FONE)
- American Organization of Nurse Executives (AONE)

Library Resources

Library Hours (Front Desk) 561.803.2226
- Monday – Thursday 7:30 a.m. – 12 midnight
- Friday 7:30 am – 5:00 p.m.
- Saturday 9:30 a.m. – 6:00 p.m.
- Sunday 2:00 p.m. – midnight

*Special hours for holidays and breaks are posted to the Library website and Facebook*

Use of Social Media Policy

The SON acknowledges the growing use of social media by faculty, staff and students as well as the increasing use of social media for educational and clinical purposes. Regardless of the social media platform, the intent of this policy is to protect sensitive and confidential information and the reputations of all persons involved with the SON. Students, staff and faculty should be thoughtful about how they present themselves as members of the PBA SON community and be aware that posted information may be public for anyone to see, may be posted or forwarded by others, and may remain available for public viewing for many years.

When communicating via email, voicemail or a social networking site, students, staff and faculty will adhere to HIPAA and FERPA guidelines at all times and refrain from the reference or representation of confidential or sensitive patient or student information through print, audio, or photographic media. They will refrain from stating or posting any material that is obscene, defamatory, profane, libelous, threatening, harassing, abusive, hateful, or embarrassing to another person within the SON or settings or agencies associated with the SON.

No student, staff or faculty member will photograph or videotape any other person for personal or social media use without express written permission of the person. When SON faculty or students are in another agency or clinical setting, they will follow the guidelines of the agency or clinical setting related to the use of social media and communication of confidential or sensitive information.
Policy Acknowledgement by the Student

POLICIES OF THIS HANDBOOK ARE IN ADDITION TO THE GOVERNING POLICIES AS NOTED IN THE GRADUATE ACADEMIC CATALOG

http://catalog.pba.edu

The signature of the graduate student below indicates they have read and understood the student handbook and agree to abide by the provisions within. This signed agreement will be uploaded into the compliance and immunization management system.

PRIVACY ACT RELEASE FORM
During the academic year at Palm Beach Atlantic University School of Nursing, it may be appropriate for School of Nursing faculty to return graded work in a public manner, for example, outside a faculty office, classroom, or clinical setting. Because Palm Beach Atlantic University does not wish to violate your privacy rights under the Family Education Rights & Privacy Act, your signature is required (below) if you are willing to waive these rights under this Act for specific, above-stated purpose. You are not required to sign this waiver/release form. If you do not sign, it will be the faculty's responsibility to return your App

PRIVACY ACT SIGNATURE STATEMENT
I certify that I have read the above statement and I waive my privacy right under the Family Education Rights & Privacy Act.
